

Access AOL Mail in Mozilla Thunderbird

To set up an AOL email account in Mozilla Thunderbird:

- Select **Tools / Account Settings...** from the menu in Mozilla Thunderbird.
- Click **Add Account...**
- Make sure **Email account** is selected.
- Click **Continue**.
- Enter your name under **Your Name:**
- Type your AOL email address under **Email Address:**
Remember to include the "@aol.com" part following your AOL screen name. If your screen name is "esempio", for example, use "esempio@aol.com".
- Click **Continue**.
- Make sure **IMAP** is selected under **Select the type of incoming server you are using**.
- Type **imap.aol.com** under **Incoming Server:**.
- Click **Continue**.
- Verify Mozilla Thunderbird has entered your AOL screen name in the:
Incoming User Name: and
Outgoing User Name: fields.
- Click **Continue**.
- Give the account a descriptive name ("AOL Email" or what Mozilla Thunderbird suggests, your AOL email address) under **Account Name:**.
- Click **Continue**.
- Now click **Done**.
- Click on **Outgoing Server** in the account list.
- Click **Add...** on the right.
- Type **AOL Email** under **Description:**.
- Enter **smtp.aol.com** under **Server Name:**.
- Type **587** under **Port:**.
- Make sure **Use name and password** is checked.
- Enter your AOL screen name under **User Name:**.
- Click **OK**.
- Now click on your AOL account in the account list.
- Under **Outgoing Server (SMTP):**, choose **AOL Email - smtp.aol.com**.
- Highlight **Copies & Folders** under your AIM Mail account in the server list.
- Make sure **Place a copy in:** is not checked under **When sending messages, automatically:**.
- Click **OK**.

Congratulations! You can now read your mail with Thunderbird from your computer and AOL Web Mail anywhere, anytime.
